

With EASYTUBE you will achieve

- Better ergonomics
- More productivity
- Reduced lead times
- Versatility
- Re-usability
- Cost efficiency

Choose your method.....

- Cost efficiency
- We design and pre-assemble. The final assembling is provided by your staff.
- We design - you assemble from your stock of **EASYTUBE** parts.
 - We deliver **EASYTUBE** parts - you design and assemble.

Arrange an appointment for an **EASYTUBE** demonstration and find out how easy it is to create and assemble your own cost-effective solutions.

LEAN MANUFACTURING CONTINUOUS IMPROVEMENT KAIZEN

x-stk.com
Applied Automation

EASYTUBE offers a range of modular components that enables you to design and build a variety of versatile structures to aid storage, assembly, manufacturing and other operations

Steel pipes available with color-coded plastic coating, powder coated or in stainless steel, are cut to length to suit individual customer designs. These are simply connected utilising a selection of steel interlocking joints and accessories, enabling rapid assembly of structures.

EASYTUBE is both versatile and cost effective as all pipes and joints are reusable, enabling constructions to be easily reconfigured or products recycled to create equipment to suit

EASYTUBE provides individual solutions for

- Dynamic Flow Racks
- Assembly Lines
- Cell Feed Systems
- FIFO Picking Systems
- Shelving and Racking
- Carts, Trucks and Trolleys
- Assembly and Packing Benches
- Kitting Systems for Parts
- Notice Boards, Sign Holders, Safety Signs
- Conveyors ...

... the only limit is your imagination!

Most joints require only a 5mm Allen Key for assembly. No special tools or technical skills are required to achieve the desired results.

A wide range of accessories such as castors, adaptors, roller tracks, label holders, end caps, adjustable feet, hinges, towing hitches and many more enables your application to be customised: an ideal system to apply to operations where Kaizen (Continuous Improvement) and Lean Manufacturing concepts are applied.

EASYTUBE provides a multifunctional aid to concept engineering, allowing continuous and cost-effective improvement to your designs.

Available in standard and custom colour finishing, the pipes and joints allow speedy realisation of creative solutions for assembly lines, warehouses, logistics operations, offices, laboratories, schools, hospitals, D.I.Y. stores, garden centres – in fact, **almost everywhere!**
